

Interactive Apps

Your subject, method or product becomes an app people can use every day.

Sound familiar?

- Turn my course into an app.
- We need onboarding for new employees.
- A calculator for our customers.

First stage

One module or one tool with the complete user route; then the remaining modules, the mentor and mobile versions.

Ongoing support

Content updates, new modules, fixes.

What you receive

- Structure and the user's route.
- An app with exercises, feedback, progress, audio and video.
- An AI mentor grounded in your materials, per the concept.
- Working tools: calculator, configurator, catalog, simulator, per the concept.
- A web version; Android and iOS per the concept.
- Source code and instructions for updating the content.

System on the shared core

Data	Agents	Connections	Control	Interfaces
Your texts, videos, comments, lessons	AI mentor grounded in your materials	Hosting and release	Full route checks	Web version; Android and iOS as needed

Experience

I created AI Academy, Modern Python, English ↔ Português and Truck Driver English. All four are my own projects, with public demos and source code on GitHub.
