

Brand Voice and Content Production

Your company or expertise has a recognizable voice, with content going out on schedule.

Sound familiar?

- I don't have time for social media.
- Here's my text: turn it into a podcast and publish it.
- I want content in my own style.

First stage

The voice map, the first month of output in the agreed formats and channels, approval and scheduled publishing set up.

Ongoing support

Output on schedule, new topics and formats, analysis of results.

What you receive

- A voice map: character, vocabulary, topics, restrictions, samples.
- A production and approval system, set up and running.
- The first month of materials in the agreed formats.
- A publishing calendar and publication in your channels.
- Per the concept: a YouTube channel, video ads, a digital presenter, translations, AI search visibility work.

System on the shared core

Data	Agents	Connections	Control	Interfaces
Voice map: character, vocabulary, topics, restrictions	Production agent: articles, video, podcasts, audio, visuals	Editorial calendar	Approval before publication	Your channels

Experience

I regularly create content for NF ELIT.
