

Business Process Automation

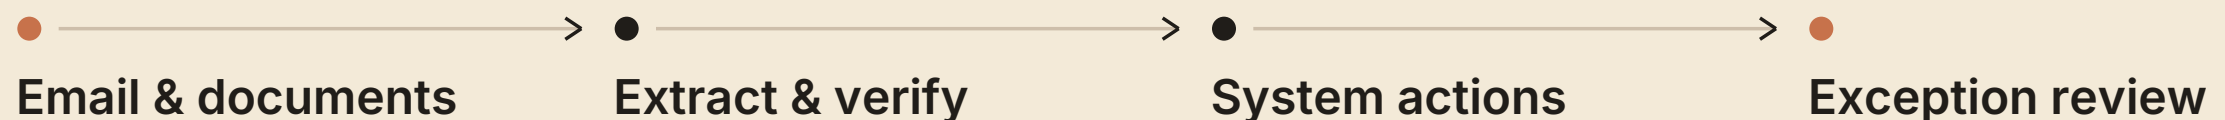

04

— From USD 300 · First stage

I connect incoming documents, business data and working systems into a process that handles routine steps and brings exceptions to your team.

HOW THE SYSTEM WORKS

From input to action

Read documents, extract fields and check them against your data.

Connected operations

Purchasing, orders, warehouse, logistics and management reporting.

Control at each step

Logs, exception handling and scenario-based acceptance.

RELEVANT EXPERIENCE

NF Prime: built a freight dispatch system that assembles load setups around equipment and delivery constraints.

Describe your task in your own words.
